## Profile

I am a full-stack developer who enjoys trying out new technologies, I pride myself in being a hard-worker that is not intimidated by learning new technologies which will be beneficial when the company has to adapt to new technologies and or uses technologies I'm not familiar with.

## Certificates

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals

## References

**Available upon request**

## Professional Experience

### Full-Stack Developer
*The Digital Academy*
Jun 2022 – present | Johannesburg, South Africa
As a full-Stack developer, I'm responsible for :
- Creating Frontend Applications using Angular, HTML, CSS and TypeScript.
- Creating Backend Applications and REST API using Express JS, Node JS and JavaScript.
- Testing APIs using Thunderclient.
- Creating and maintaining databases using pgAdmin (PostgreSQL).
- Designing wireframes using Figma.
- Designing and creating UML diagrams using Draw IO.
- Tracking & managing tasks using Trello and Gitlab issues.
- Collaborating with teams using Gitlab and Github.
- Performing daily Stand ups on Discord.

## Education

### National Diploma IT: Software Development
*Tshwane University Of Technology*
Jan 2018 – Nov 2021 | Pretoria, South Africa

## Projects

### Kontrak
Sep 2022 – Oct 2022
The application to connect home and property owning clients with job seeking contractors.

I was responsible for creating Backend Application and REST API using Express JS, Node JS and JavaScript.
As well as creating the database using PGAdmin.
In the frontend I was responsible for design using Figma as well as the Navbars UI and functionality and overall UI fixations.
I was responsible for maintaining Trello and making sure all constraints and points are accurate.

### Posh Ecommerce Store
Jul 2022 – Aug 2022
The application is an E-commerce website.

I was responsible for Frontend design and development, as well as Backend development .

### Socialite social media app
Aug 2022 – Sep 2022
The application purpose is a copy of an existing social media application, which in this case was facebook.

I was responsible for the UI/UX re-design and frontend development.
